| 5.7 | Please provide details of the examination system (Whether examination based or practical based) | <p><u>Assessment</u></p> <p>Students are assessed continuously throughout the semester by theory examinations, lab evaluations, assignments, quizzes, project work etc. In order to enhance the higher order thinking capability of the students and to test their knowledge in applying the concepts learned, the theory examinations are usually conducted as open note book exams. The lab experiments are also made challenging and innovative. Students also execute inter disciplinary team projects called Engineering Clinics every semester. The evaluation of these projects are also done continuously through student presentations and the final evaluation is done by industry experts during an expo.</p> <p><u>The examination system of the University</u></p> <p>Every faculty member is trained to set high-order-thinking (HOT) questions which are challenging. Invigilation and evaluation of answers scripts is also a part of faculty academic assignment. The examination system of the University is designed to test systematically the student's progress in class and laboratory through continuous evaluation system. Students are given three periodical Continuous Assessment Tests (CAT), short quizzes, home assignments, seminars and tutorials. The final result in each course is calculated on the basis of this continuous assessment and performance throughout semester.</p> <p>The weightage for theory and practical varies from course to course. All theory exams are open note book exams where all the questions are application oriented and higher order thinking. Continuous evaluation is carried out in all labs for a particular subject. Every student needs to solve the given problems/ programs in the lab period and assessed by faculty by the end of each lab. All lab experiments are based on design and application of concepts learned in the theory</p> | |

| | | | |
|--------|---|---|---------------------------------------|
| | | <p>classes. The students handle state of the art equipment to solve real world problems.</p> <p>For each course a set of question papers are prepared by individual faculty. These question papers are put through a moderation panel consisting of senior faculty in that domain. On the examination day any of the moderated paper can be picked randomly by the examination department. Similarly, the evaluation is done by faculty who are allotted answer scripts of the same course randomly to maintain anonymity. Revaluation and grade sheet generation are all facilitated by our in-house online software VTOP. This provides additional anonymity between student and faculty.</p> | |
| 5.8 | What methods of evaluation of answer scripts does the University follow? Whether external experts are invited for evaluation? | Digital exam pads are used to write the examinations. Annexure-1

Assessment

Students are assessed continuously throughout the semester by theory examinations, lab evaluations, assignments, quizzes, project work etc. In order to enhance the higher order thinking capability of the students and to test their knowledge in applying the concepts learned, the theory examinations are usually conducted as open note book exams. The lab experiments are also made challenging and innovative. Students also execute inter disciplinary team projects called Engineering Clinics every semester. The evaluation of these projects are also done continuously through student presentations and the final evaluation is done by industry experts during an expo.

The examination system of the University

Every faculty member is trained to set high-order-thinking (HOT) questions which are challenging. Invigilation and evaluation of answers scripts is also a part of faculty academic assignment. The examination system of the University is designed to test systematically the student's progress in class and laboratory through continuous evaluation system. Students are given three periodical Continuous Assessment Tests (CAT), short quizzes, home assignments, seminars and tutorials. The final result in each course is calculated on the basis of this continuous assessment and performance throughout semester.

The weightage for theory and practical varies from course to course. All theory exams are open note book exams where all the questions are application oriented and higher order thinking. Continuous evaluation is carried out in all labs for a particular subject. Every student needs to solve the given problems/ programs in the lab period and assessed by faculty by the end of each lab. All lab experiments are based on design and application of concepts learned in the theory classes. The students handle state of the art equipment to solve real world problems.

For each course a set of question papers are prepared by individual faculty. These question papers are put through a moderation panel consisting of senior faculty in that domain. On the examination day any of the moderated paper can be picked randomly by the examination department. Similarly, the evaluation is done by faculty who are allotted answer scripts of the same course randomly to maintain anonymity. Revaluation and grade sheet generation are all facilitated by our in-house online software VTOP. This provides additional anonymity between student and faculty.

Annexure 2

Students selection criteria for various courses

The weightage is given to all the below based on the course

- a. **Through special entrance tests**
- b. **Through interviews**
- c. **Through their academic record**
- d. **Through combination of the above**

UG:

The students for B.Tech programme are selected for admission through the VIT Engineering Entrance Examinations (VITEEE) conducted every year throughout India and abroad. In addition, the students need to get a minimum of 60% average in physics, chemistry and Mathematics in their XII std. examinations.

The students for the BBA programme are selected based on academic performance weightages given to different components are as given below:

| | |
|--------------------------------|------|
| 10 th Std. results: | 25%, |
| 12 th Std. results: | 25% |
| Management task: | 20% |
| Personal Interview: | 30%. |

In addition, the students need to get a minimum of 60% average in their XII std examinations.

M.Tech (Integrated):

The students for the M.Tech (Integrated) programme are selected based the aggregate marks in physics, chemistry and mathematics in their XII std examinations. In addition, the students need to get a minimum of 70% average in physics, chemistry and mathematics in their XII std examinations.

Ph.D:

The students for the Ph.D programme are selected based on performance in the VIT Research Entrance Examination (VITREE) conducted throughout the country and an interview.
