

Advanced Data Analytics Tools

(A Value Added Course)
offered by

School of Computer Science & Engineering (SCOPE)

In this course, you will able to learn types of data analytics and core concepts. You will learn about the tools and skills required to conduct data analysis. We will go through some of the foundational math and statistics used in data analysis and workflows for conducting efficient and effective data analytics. This course covers a wide variety of topics that are critical for working in data analytics and are designed to give you an introduction and overview as you begin to build relevant knowledge and skills.

Course Benefits:-

- Explore the various forms of electronic information.
- Learn to Organize, visualize, and analyze large, complex datasets using descriptive statistics and graphs to make decisions.
- Understand the predictive models for data
- Learn Exploratory data analysis using Rand Python, Microsoft Excel,
- Analyze the data using Tableau, Power BI, QlikView.
- Gain hands-on experience on advanced data analytics tools

EVERY MONDAY, WEDNESDAY & FRIDAY 6.00 PM to 8.00 PM Commence from 27-06-2022.

Certificate after completion of course

Instructor: Dr. Sheela J
